MULTI-PLAY COMPACT DISC PLAYER

PD-M601

PD-M551

PD-M501

PD-M601, PD-M551 AND PD-M501 HAVE THE FOLLOWING :

Type	Model			Power Requirement	Remarks
			PD-M501		
KU	○	○	○	AC120V only	
KUXJS	○	○	○	AC120V only	
KC	○	-	○	AC120V only	
KCXJS	○	-	○	AC120V only	
WEMXJS	○	-	○	AC220V-240V	
WBXJS	○	-	-	AC220V-240V	
RD	-	-	○	AC110-127V, 220-240V (switchable)	
WPW	-	-	○	AC220V-240V	

- This manual is applicable to the following : PD-M601/KU, KUXJS, KC and KCXJS ; PD-M551/KU and KUXJS ; PD-M501/KU, KUXJS, KC and KCXJS.
- For the following : PD-M601/KUXJS, KC and KCXJS ; PD-M551/KU and KUXJS ; PD-M501/KU, KUXJS, KC and KCXJS, refer to page 39.
- For the other types, refer to applicable service manuals.

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual. Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

WARNING

Lead in solder used in this product is listed by the California Health and Welfare agency as a known reproductive toxicant which may cause birth defects or other reproductive harm (California Health & Safety Code, Section 25249.5). When servicing or handling circuit boards and other components which contain lead in solder, avoid unprotected skin contact with the solder. Also, when soldering do not inhale any smoke or fumes produced.

1. SAFETY INFORMATION

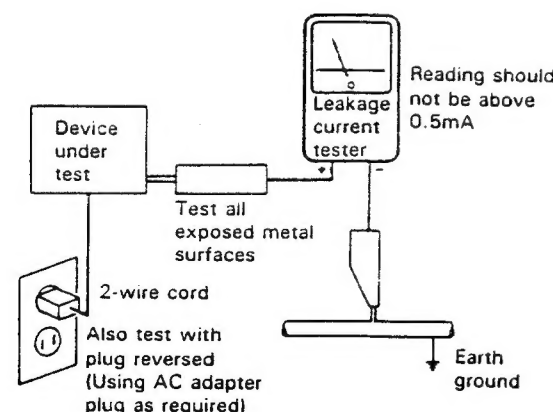

(FOR USA MODEL ONLY)

1. SAFETY PRECAUTIONS

The following check should be performed for the continued protection of the customer and service technician.

LEAKAGE CURRENT CHECK

Measure leakage current to a known earth ground (water pipe, conduit, etc.) by connecting a leakage current tester such as Simpson Model 229-2 or equivalent between the earth ground and all exposed metal parts of the appliance (input/output terminals, screwheads, metal overlays, control shaft, etc.). Plug the AC line cord of the appliance directly into a 120V AC 60Hz outlet and turn the AC power switch on. Any current measured must not exceed 0.5mA.

AC Leakage Test

ANY MEASUREMENTS NOT WITHIN THE LIMITS OUTLINED ABOVE ARE INDICATIVE OF A POTENTIAL SHOCK HAZARD AND MUST BE CORRECTED BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.

2. PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in the appliance have special safety related characteristics. These are often not evident from visual inspection nor the protection afforded by them necessarily can be obtained by using replacement components rated for voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in this Service Manual.

Electrical components having such features are identified by marking with a Δ on the schematics and on the parts list in this Service Manual. The use of a substitute replacement component which does not have the same safety characteristics as the PIONEER recommended replacement one, shown in the parts list in this Service Manual, may create shock, fire, or other hazards.

Product Safety is continuously under review and new instructions are issued from time to time. For the latest information, always consult the current PIONEER Service Manual. A subscription to, or additional copies of, PIONEER Service Manual may be obtained at a nominal charge from PIONEER.

Additional Laser Caution

- Laser Interlock Mechanism**
The ON/OFF (ON : low level, OFF : high level) status of the LPS1 (S601) and LPS2 (S602) switches for detecting the loading state is detected by the system microprocessor, and the design prevents laser diode oscillation when both switches LPS1 and LPS2 are not ON (low level) (clamped state).
Thus, interlock will no longer function if switches LPS1 (S601) and LPS2 (S602) are deliberately shorted.
The interlock also does not operate in the test mode. *
Laser diode oscillation will continue, if pins 1 and 2 of M51593FP (IC101) on the preamplifier board loaded on pick up assembly are connected to GND, or pin 19 is connected to low level (ON), or else the terminals of Q101 are shorted to each other (fault condition).
- When the cover is opened with the servo mechanism block removed to be turned over, close viewing of the objective lens with the naked eye will cause exposure to a Class 1 laser beam.

'92 M1

* : Refer to page 28.

2. EXPLODED VIEWS AND PARTS LIST

2.1 EXTERIOR

NOTES:

- The parts with an encircled number are generally unavailable because they are not in our Master Spare Parts List.
- The Δ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

● IC BLOCK DIAGRAMS

1. RESISTORS:

Indicated in Ω , $1/4W$, $1/6W$ and $1/8W$, $\pm 5\%$ tolerance unless otherwise noted k; k Ω , M; M Ω , (F); $\pm 1\%$, (G); $\pm 2\%$, (K); $\pm 10\%$, (M); $\pm 20\%$ tolerance.

2. CAPACITORS:

Indicated in capacity (μF) / voltage(V) unless otherwise noted p; pF. Indication without voltage is 50V except electrolytic capacitor.

3. VOLTAGE, CURRENT:

□ : DC voltage (V) at play state.
 ⇔ mA : DC current at play state.
 Value in () is DC current at stop state.

4. OTHERS:

→ : Signal route.
 ○ : Adjusting point.

The \perp mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.

* marked capacitors and resistors have parts numbers.

This is the basic schematic diagram, but the actual circuit may vary due to improvements in design.

7. PCB PARTS LIST

NOTES:

- Part without part number cannot be supplied.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.
- The Δ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex.1 When there are 2 effective digits(any digit apart from 0), such as 560 ohm and 47k ohm(tolerance is shown by J=5%, and K=10%).

560 Ω 56 × 10¹ 561 RD1/8PM 561J

47k Ω 47 × 10³ 473 RD1/4PS 473J

0.5 Ω 0R5 RN2H 0R5K

1 Ω 010 RSIP 010K

Ex.2 When there are 3 effective digits(such as in high precision metal film resistors).

5.62k Ω 562 × 10¹ 5621 RN1/4SR 5621F

8. ADJUSTMENTS

8.1. Adjustment Methods

If a disc player is adjusted incorrectly or inadequately, it may malfunction or not work at all even though there is nothing at all wrong with the pickup or the circuitry. Adjust correctly following the adjustment procedure.

● Adjustment Items/Verification Items and Order

If the specified values cannot be obtained or no adjustment is possible by performing the verifications or adjustments described in steps 1 – 4, the pickup block may be defective.

Step	Item	Test Point	Adjustment Location
1	Focus offset verification	TP1, Pin 6(FCS. ERR)	None
2	Tracking error balance verification	TP1, Pin 2(TRK. ERR)	None
3	Pickup radial/tangential direction tilt adjustment	TP1, Pin 1 (RF)	Radial tilt adjustment screw, Tangential tilt adjustment screw
4	RF level verification	TP1, Pin 1 (RF)	None
5	Focus servo loop gain adjustment	TP1, Pin 5(FCS. IN) TP1, Pin 6(FCS. ERR)	VR152(FCS. GAN)
6	Tracking servo loop gain adjustment	TP1, Pin 3(TRK. IN) TP1, Pin 2(TRK. ERR)	VR151 (TRK. GAN)

● Abbreviation table

FCS. ERR	:Focus Error
TRK. ERR	:Tracking Error
FCS GAN	:Focus Gain
TRK GAN	:Tracking Gain
FCS. IN	:Focus In
TRK. IN	:Tracking In

● Measuring Instruments and Tools

1. Dual trace oscilloscope (10:1 probe)
2. Low-frequency oscillator
3. Test disc (YEDS-7)
4. Low pass filter ($39k\Omega$ + $0.001\mu F$)
5. Resistor (100 k Ω)
6. Standard tools

● Test Point and Adjustment Variable Resistor Positions

Figure 1 Adjustment Locations

● Notes

1. Use a 10:1 probe for the oscilloscope.
2. All the knob positions (settings) for the oscilloscope in the adjustment procedures are for when a 10:1 probe is used.

● Test Mode

These models have a test mode so that the adjustments and checks required for service can be carried out easily. When these models are in test mode, the keys on the front panel work differently from normal. Adjustments and checks can be carried out by operating these keys with the correct procedure. For these models, all adjustments are carried out in test mode.

[Setting these models to test mode]

How to set this model into test mode.

1. Unplug the power cord from the AC socket.
2. Short the test mode jumper wires. (See Figure 1.)
3. Plug the power cord back into the AC socket.

When the test mode is set correctly, the display is different from what it usually is when the power is turned on. If the display is still the same as usual, test mode has not been set correctly, so repeat Steps 1 – 3.

[Release from test mode]

Here is the procedure for releasing the test mode:

1. Press the STOP key and stop all operations.
2. Unplug the power cord from the AC socket.

[Operations of the keys in test mode]

Code	Key Name	Function in Test Mode	Explanation
	PGM (PROGRAM)	Focus servo close	<p>The laser diode is lit up and the focus actuator is lifted up, then lowered slowly and the focus servo is closed at the point where the objective lens is focused on the disc. With the player in this state, if you lightly rotate the stopped disc by hand, you can hear the sound the focus servo.</p> <p>If you can hear this sound, the focus servo is operating correctly. If you press this key with no disc mounted, the laser diode lights up, the focus actuator is pulled up, then the actuator is lowered and raised three times and returned to its original position.</p>
▷	PLAY	Spindle servo ON	<p>Starts the spindle motor in the clockwise direction and when the disc rotation reaches the prescribed speed (about 500 rpm at the inner periphery), sets the spindle servo in a closed loop.</p> <p>Be careful. Pressing this key when there is no disc mounted makes the spindle motor run at the maximum speed.</p> <p>If the focus servo does not go correctly into a closed loop or the laser light shines on the mirror section at the outermost periphery of the disc, the same symptom is occurred.</p>
□□	PAUSE	Tracking servo close/open	<p>Pressing this key when the focus servo and spindle servo are operating correctly in closed loops puts the tracking servo into a closed loop, displays the track number being played back and the elapsed time on the front panel, and outputs the playback signal.</p> <p>If the elapsed time is not displayed or not counted correctly or the audio is not played back correctly, it may be that the laser is shining on the section with no sound recorded at the outer edge of the disc, that something is out of adjustment, or that there is some other problem.</p> <p>This key is a toggle key and open/close the tracking servo alternately. This key has no effect if no disc is mounted.</p>

Code	Key Name	Function In Test Mode	Explanation
	TRACK / MANUAL SEARCH REV	Carriage reverse (inwards)	Moves the pickup position toward the inner diameter of the disc. When this key is pressed with the tracking servo in a closed loop, the tracking servo automatically goes into an open loop. Since the motor does not automatically stop at the mechanical end point in test mode, be careful with this operation.
	TRACK / MANUAL SEARCH FWD	Carriage forward (outwards)	Moves the pickup position toward the outer diameter of the disc. When this key is pressed with the tracking servo in a closed loop, the tracking servo automatically goes into an open loop. Since the motor does not automatically stop at the mechanical end point in test mode, be careful with this operation.
	STOP	Stop	Initializes and the disc rotation stops. The pickup and disc remain where they are when this key is pressed.
	EJECT	CD magazine eject	Stores Disc 1 in the CD magazine, then ejects the CD magazine. However, even though the CD magazine is ejected, the pickup does not return to the park position. Even if the CD magazine is mounted again, the pickup remains where it is.

Note : When inserting the magazine, disc 1 of the magazine is loaded automatically.

[How to play back a disc in test mode]

In test mode, since the servos operate independently, playing back a disc requires that you operate the keys in the correct order to close the servos.

Here is the key operation sequence for playing back a disc in test mode.

Wait at least 2-3 seconds between each of these operations.

1. Focus Offset Verification

● Objective	Verify the DC offset for the focus error amp.		
● Symptom when out of adjustment	The model does not focus in and the RF signal is dirty.		
● Measurement instrument connections	Connect the oscilloscope to TP1, Pin 6 (FCS. ERR)	● Player state	Test mode, stopped (just the Power switch on)
	[Settings] 5 mV/division 10 ms/division DC mode	● Adjustment location	None
		● Disc	None needed
[Procedure] Verify the DC voltage at TP1, Pin 6 (FCS. ERR) is 0 ± 50 mV.			

Note : If the specified values cannot be obtained or no adjustment is possible by performing the verifications or adjustments described in adjustment items 1 – 4, the pickup block may be defective.

2. Tracking Error Balance Verification

● Objective	To verify that there is no variation in the sensitivity of the tracking photo diode.		
● Symptom when out of adjustment	Play does not start or track search is impossible.		
● Measurement instrument connections	Connect the oscilloscope to TP1, Pin 2 (TRK. ERR). This connection may be via a low pass filter.	● Player state	Test mode, focus and spindle servos closed and tracking servo open
	[Settings] 50 mV/division 5 ms/division DC mode	● Adjustment location	None
		● Disc	YEDS-7

[Procedure]

1. Move the pickup to midway across the disc (R=35 mm) with the TRACK/MANUAL SEARCH FWD $\triangleright\triangleright \cdot \triangleright\triangleright$ or REV $\triangleleft\triangleleft \cdot \triangleleft\triangleleft$ key.
2. Press the PGM (PROGRAM) key, then the PLAY \triangleright key in that order to close the focus servo then the spindle servo.
3. Line up the bright line (ground) at the center of the oscilloscope screen and put the oscilloscope into DC mode.
4. Supposing that the positive amplitude of the tracking error signal at TP1, pin 2 (TRK ERR) is (A) and the negative amplitude is (B), the following expression is satisfied.

$$A \geq B : \frac{A-B}{C} \times \frac{1}{2} \leq 0.1$$

$$A < B : \frac{B-A}{C} \times \frac{1}{2} \leq 0.1$$

When there is a DC component

When there is no DC component

3. Pickup Radial/Tangential Tilt Adjustment

● Objective	To adjust the angle of the pickup relative to the disc so that the laser beams are shone straight down into the disc for the best read out of the RF signals.		
● Symptom when out of adjustment	Sound broken; some discs can be played but not others.		
● Measurement instrument connections	Connect the oscilloscope to TP1, Pin 1 (RF). [Settings] 20 mV/division 200 ns/division AC mode	● Player state ● Adjustment location ● Disc	Test mode, play Pickup radial tilt adjustment screw and tangential tilt adjustment screw YEDS-7

[Procedure]

1. Press the TRACK/MANUAL SEARCH FWD $\triangleright\triangleright$ · $\triangleright\triangleright$ or REV $\triangleleft\triangleleft$ · $\triangleleft\triangleleft$ key to move the pickup to halfway across the disc (R=35mm).
Press the PGM (PROGRAM) key, the PLAY \triangleright key, then the PAUSE $\square\square$ key in that order to close the respective servos and put the player into play mode.
2. First, adjust the radial tilt adjustment screw with a Phillips screwdriver so that the eye pattern (the diamond shape at the center of the RF signal) can be seen the most clearly.
3. Next, adjust the tangential tilt adjustment screw with a Phillips screwdriver so that the eye pattern (the diamond shape at the center of the RF signal) can be seen the most clearly (Figure 3).
4. Adjust the radial tilt adjustment screw and the tangential tilt adjustment screw again so that the eye pattern can be seen the most clearly. As necessary, adjust the two screws alternately so that the eye pattern can be seen the most clearly.
5. When the adjustment is completed, lock the radial and tangential adjustment screw.

Note: Radial and tangential mean the directions relative to the disc shown in Figure 2.

Figure 3 Eye pattern

4. RF Level Verification

● Objective	To verify the playback RF signal amplitude		
● Symptom when out of adjustment	No play or no search		
● Measurement instrument connections	Connect the oscilloscope to TP1, Pin 1 (RF).	● Player state	Test mode, play
	[Settings] 50 mV/division 10 ms/division AC mode	● Adjustment location	None
		● Disc	YEDS-7

[Procedure]

1. Move the pickup to midway across the disc (R=35 mm) with the TRACK/MANUAL SEARCH FWD $\triangleright\triangleright$ • $\triangleright\triangleright$ or REV $\triangleleft\triangleleft$ • $\triangleleft\triangleleft$ key, then press the PGM (PROGRAM) key, the PLAY \triangleright key, then the PAUSE $\square\square$ key in that order to close the respective servos and put the player into play mode.
2. Verify the RF signal amplitude is $1.2\text{ Vp-p} \pm 0.2\text{ V}$.

5. Focus Servo Loop Gain Adjustment

● Objective	To optimize the focus servo loop gain.		
● Symptom when out of adjustment	Playback does not start or focus actuator noisy.		
● Measurement instrument connections	See figure 4. [Settings] CH1 20 mV/division X-Y mode	CH2 5 mV/division X-Y mode	● Player state Test mode, play ● Adjustment location VR152 (FCS. GAN) ● Disc YEDS-7

[Procedure]

1. Set the AF generator output to 1.2 kHz and 1 Vp-p.
2. Press the TRACK/MANUAL SEARCH FWD $\triangleright\triangleright$ or REV $\triangleleft\triangleleft$ key to move the pickup to halfway across the disc (R=35 mm), then press the PGM (PROGRAM) key, the PLAY \triangleright key, then the PAUSE $\square\square$ key in that order to close the corresponding servos and put the player into play mode.
3. Adjust VR152 (FCS. GAN) so that the Lissajous waveform is symmetrical about the X axis and the Y axis.

Lower gain

6. Tracking Servo Loop Gain Adjustment

● Objective	To optimize the tracking servo loop gain.		
● Symptom when out of adjustment	Playback does not start, during searches the actuator is noisy, or tracks are skipped.		
● Measurement instrument connections	See Figure 5.	● Player state	Test mode, play
	[Settings] CH1 CH2 50 mV/division 20 mV/division X-Y mode	● Adjustment location VR151 (TRK. GAN) ● Disc YEDS-7	

[Procedure]

1. Set the AF generator output to 1.2 kHz and 2 Vp-p.
2. Press the TRACK/MANUAL SEARCH FWD $\gg \cdot \gg$ or REV $\ll \cdot \ll$ key to move the pickup to halfway across the disc (R=35 mm), then press the PGM (PROGRAM) key, the PLAY \triangleright key, then the PAUSE $\square\square$ key in that order to close the corresponding servos and put the player into play mode.
3. Adjust VR151 (TRK. GAN) so that the Lissajous waveform is symmetrical about the X axis and the Y axis.

◎ MOTHER BOARD ASSEMBLY (PWM1582 and PWM1579)

PWM1582 , PWM1579 and PWM1583 have the same construction except for the following :

Mark	Symbol & Description	Part No.			Remarks
		PWM1583	PWM1582	PWM1579	
	IC405 IC406 D391 C433, 434 (22 μ /25V) C433, 434 R445, 446 R447, 448 R470, 471 CN351 (32P FFC connector) CN351 (30P FFC connector)	NJM4565D-D BA15218 1SS254 PCH1107 RD1/6PM271J RD1/6PM471J RD1/6PM470J HLEM32S-1	NJM4558D-D 1SS254 CEAS220M25 RD1/6PM681J HLEM32S-1	NJM4558D-D CEAS220M25 RD1/6PM681J HLEM30S-1	

FUNCTION BOARD ASSEMBLY

Function board assembly of PD - M551 and PD - M501 and Function board assembly of PD - M601 have the same construction except for the following :

Mark	Symbol & Description	Part No.			Remarks
		PD-M601	PD-M551	PD-M501	
	CN701 (32P FFC connector) CN701 (30P FFC connector) Remote sensor	HLEM32R-1 SBX1610-51	HLEM32R-1 SBX1610-51 HLEM30R-1	

10. PANEL FACILITIES

FRONT PANEL

- ① POWER STANDBY/ON switch and STANDBY indicator
- ② Remote sensor (PD-M601/PD-M551 only)
Receives the signal from the remote control unit.
• The PD-M501 is not equipped with the remote sensor.
- ③ Disc number buttons (DISC 1 - DISC 6)
- ④ TIME button
- ⑤ Stop button (■)
- ⑥ REPEAT button
- ⑦ RANDOM PLAY button
- ⑧ Track/Manual search buttons (◀◀ ◀▶▶ ▶▶)
- ⑨ EJECT button (▲)
- ⑩ Magazine insertion slot
- ⑪ PROGRAM button
- ⑫ DELETE button

- ⑬ AUTO FADER button
- ⑭ HI-LITE SCAN button
- ⑮ COMPU PGM EDIT button
- ⑯ TIME FADE EDIT button
- ⑰ Pause button (⏸)
- ⑱ ADLC (Automatic Digital Level Controller) button
- ⑲ Headphones jack (PHONES) and headphones volume control (PHONES LEVEL)(PD-M601 only)
- ⑳ Play button (▶)

REMOTE CONTROL UNIT (PD-M601/PD-M551 only)
Remote control buttons with the same names or marks as buttons on the front panel of the player control the same operations as the corresponding front panel buttons.

- ① POWER button
- ② DISC NUMBER buttons (1 - 6)
- ③ STOP button (■)
- ④ RANDOM PLAY button
- ⑤ HI-LITE SCAN button
- ⑥ FADER button
- ⑦ ADLC (Automatic Digital Level Controller) button
- ⑧ CHECK button
- ⑨ OUTPUT LEVEL buttons (+ / -)
- ⑩ PAUSE button (⏸)
- ⑪ PLAY button (▶)
- ⑫ MANUAL search buttons (◀◀ / ▶▶)
- ⑬ TRACK search buttons (◀◀ / ▶▶)
- ⑭ DELETE button
- ⑮ PGM (program) button
- ⑯ CLEAR button

11. SPECIFICATIONS

1. General

Type	Compact disc digital audio system
Power requirements	
U.K. and Australian models	AC 220 - 240 V, 60 Hz
U.S. and Canadian models	AC 120 V, 60 Hz
Other models	AC 110 - 127V/220 - 240 V (switchable), 50/60 Hz
Power consumption	
U.S. and Canadian models	12 W
U.K., Australian and other models	14 W
Operating temperature	+5°C - +35°C (+41°F - +95°F)
Weight	3.8 kg (8 lb, 6 oz)
External dimensions	
PD-M601/PD-551	420 (W) X 291 (D) X 105 (H) mm 16-9/16 (W) X 11-7/16 (D) X 4-1/8 (H) in
PD-M501	420 (W) X 291 (D) X 100 (H) mm 16-9/16 (W) X 11-7/16 (D) X 3-15/16 (H) in

2. Audio section

Frequency response	2 Hz - 20 kHz
S/N ratio	102 dB or more (EIAJ)
Dynamic range	96 dB or more (EIAJ)
Harmonic distortion	0.003% or less (EIAJ)
Output voltage	2.0V
Wow and flutter	Limit of measurement $\pm 0.001\%$ W:PEAK or less (EIAJ)
Channels	2-channel (stereo)

3. Output terminal

Audio line output
Headphone jack with volume control (PD-M601/PD-M551 only)
Control input/output jacks (available with the PD-M551/PD-M501
and U.S. and Canadian models of the PD-M601)
CD-DECK SYNCHRO jack

4. Accessories

- Remote control unit (PD-M601/PD-M551 only) 1
- Size AAA/R03/dry batteries
(PD-M601/PD-M551 only) 2
- Six-compact-disc magazine 1
- Control cord (provided with PD-M551/PD-M501
and U.S. and Canadian models of PD-M601 only) 1
- Output cord 1
- Operating instructions 1

NOTE:

Specifications and design subject to possible modification without notice, due to improvements.

The Magazine Type Multi-Play CD Players with  mark and the Magazines with the same mark are compatible for 5-inch (12cm) discs.
